

# Topper Mantra Innovation Challenge (TMIC) 2026

## Theme 5: Governance, Transparency & Anti-Corruption

50 Core Hackathon Problem Statements | Classes 8-12

Readable handbook format with bold section labels, objective bullets, scope, impact, and challenge tags.

### Contents

#### **A. Public Service Transparency & Citizen Access**

TMIC-GOV-001 - Public Service Status Tracker  
TMIC-GOV-002 - Queue Transparency System for Public Offices  
TMIC-GOV-003 - Document Requirement Checker  
TMIC-GOV-004 - Government Form Simplifier  
TMIC-GOV-005 - Citizen Service Time Estimator  
TMIC-GOV-006 - One-Stop Local Service Navigator  
TMIC-GOV-007 - Public Office Feedback System  
TMIC-GOV-008 - Local Language Governance Assistant  
TMIC-GOV-009 - Citizen Rights Help Tool  
TMIC-GOV-010 - Middleman-Free Service Access Model

#### **B. Grievance, Complaint & Accountability Systems**

TMIC-GOV-011 - Smart Grievance Filing System  
TMIC-GOV-012 - Complaint Escalation Tracker  
TMIC-GOV-013 - Public Problem Heatmap  
TMIC-GOV-014 - Evidence-Based Complaint Builder  
TMIC-GOV-015 - Anonymous Corruption Reporting Support  
TMIC-GOV-016 - Repeated Complaint Pattern Detector  
TMIC-GOV-017 - Grievance Response Quality Checker  
TMIC-GOV-018 - Citizen Follow-Up Reminder System  
TMIC-GOV-019 - Public Issue Verification Network  
TMIC-GOV-020 - Governance Transparency Dashboard

#### **C. Anti-Corruption, Fair Process & Public Trust**

TMIC-GOV-021 - Bribe Risk Awareness System  
TMIC-GOV-022 - Official Fee Verification Tool  
TMIC-GOV-023 - Receipt and Payment Transparency System  
TMIC-GOV-024 - Fair Selection Transparency Tool  
TMIC-GOV-025 - Public Work Progress Tracker  
TMIC-GOV-026 - Local Budget Visibility Tool  
TMIC-GOV-027 - Procurement Transparency Model  
TMIC-GOV-028 - Conflict of Interest Detector  
TMIC-GOV-029 - Public Asset Verification System  
TMIC-GOV-030 - Trust Score for Public Service Centres

#### **D. School Governance, Student Voice & Institutional Transparency**

TMIC-GOV-031 - Student Suggestion to Action Tracker  
TMIC-GOV-032 - Transparent School Resource Usage

TMIC-GOV-033 - School Complaint Redressal System  
TMIC-GOV-034 - Fair House and Club Selection System  
TMIC-GOV-035 - School Fee Transparency Tool  
TMIC-GOV-036 - Parent-School Communication Accountability  
TMIC-GOV-037 - Transparent Event Budget Planner  
TMIC-GOV-038 - Student Council Governance Dashboard  
TMIC-GOV-039 - School Maintenance Request System  
TMIC-GOV-040 - Transparent Scholarship Support System

**E. Welfare Delivery, Civic Participation & Community Governance**

TMIC-GOV-041 - Welfare Scheme Eligibility Checker  
TMIC-GOV-042 - Benefit Delivery Tracking System  
TMIC-GOV-043 - Local Development Voting Platform  
TMIC-GOV-044 - Civic Duty Gamification System  
TMIC-GOV-045 - Verified Helpline Directory  
TMIC-GOV-046 - Public Meeting Transparency Tool  
TMIC-GOV-047 - Social Audit Toolkit for Students  
TMIC-GOV-048 - Inclusive Access to Government Services  
TMIC-GOV-049 - Public Facility Rating System  
TMIC-GOV-050 - Student-Led Transparent Locality Model

## A. Public Service Transparency & Citizen Access

### TMIC-GOV-001

#### Public Service Status Tracker

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Citizens often struggle with unclear procedures, missing documents, long queues, repeated visits, and dependency on informal help while accessing public services. A transparent and simple service experience can reduce confusion and make governance more accessible for every family.

**Problem Statement:** Build a solution that allows citizens to track the status of government service requests such as certificates, applications, licenses, complaints, or approvals in a simple and transparent way.

**Objectives:**

- Improve clarity of public service processes
- Reduce unnecessary visits and dependency on middlemen
- Make service information easier to understand
- Build citizen confidence in transparent systems

**Scope of Innovation:** Participants may build service trackers, step-by-step guides, document checkers, queue tools, local language assistants, status dashboards, help kiosks, or low-resource workflow models.

**Expected Impact:** Citizens can access services with better clarity, fewer delays, and greater confidence in official processes.

**Challenge Tags:** Public Services • Citizen Access • Transparency • Service Delivery

### TMIC-GOV-002

#### Queue Transparency System for Public Offices

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Citizens often struggle with unclear procedures, missing documents, long queues, repeated visits, and dependency on informal help while accessing public services. A transparent and simple service experience can reduce confusion and make governance more accessible for every family.

**Problem Statement:** Build a system that helps citizens know their queue number, expected waiting time, required counter, and service status in public offices to reduce confusion and dependency on middlemen.

**Objectives:**

- Improve clarity of public service processes
- Reduce unnecessary visits and dependency on middlemen
- Make service information easier to understand
- Build citizen confidence in transparent systems

**Scope of Innovation:** Participants may build service trackers, step-by-step guides, document checkers, queue tools, local language assistants, status dashboards, help kiosks, or low-resource workflow models.

**Expected Impact:** Citizens can access services with better clarity, fewer delays, and greater confidence in official processes.

**Challenge Tags:** Public Services • Citizen Access • Transparency • Service Delivery

### TMIC-GOV-003

#### Document Requirement Checker

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Citizens often struggle with unclear procedures, missing documents, long queues, repeated visits, and dependency on informal help while accessing public services. A transparent and simple service experience can reduce

confusion and make governance more accessible for every family.

**Problem Statement:** Build a tool that tells citizens exactly which documents are required for common services such as caste certificate, income certificate, residence certificate, scholarship, pension, or admission-related applications.

**Objectives:**

- Improve clarity of public service processes
- Reduce unnecessary visits and dependency on middlemen
- Make service information easier to understand
- Build citizen confidence in transparent systems

**Scope of Innovation:** Participants may build service trackers, step-by-step guides, document checkers, queue tools, local language assistants, status dashboards, help kiosks, or low-resource workflow models.

**Expected Impact:** Citizens can access services with better clarity, fewer delays, and greater confidence in official processes.

**Challenge Tags:** Public Services • Citizen Access • Transparency • Service Delivery

---

## TMIC-GOV-004

### Government Form Simplifier

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Citizens often struggle with unclear procedures, missing documents, long queues, repeated visits, and dependency on informal help while accessing public services. A transparent and simple service experience can reduce confusion and make governance more accessible for every family.

**Problem Statement:** Build a solution that converts complex government forms into simple step-by-step guidance using local language, examples, error checks, and document reminders.

**Objectives:**

- Improve clarity of public service processes
- Reduce unnecessary visits and dependency on middlemen
- Make service information easier to understand
- Build citizen confidence in transparent systems

**Scope of Innovation:** Participants may build service trackers, step-by-step guides, document checkers, queue tools, local language assistants, status dashboards, help kiosks, or low-resource workflow models.

**Expected Impact:** Citizens can access services with better clarity, fewer delays, and greater confidence in official processes.

**Challenge Tags:** Public Services • Citizen Access • Transparency • Service Delivery

---

## TMIC-GOV-005

### Citizen Service Time Estimator

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Citizens often struggle with unclear procedures, missing documents, long queues, repeated visits, and dependency on informal help while accessing public services. A transparent and simple service experience can reduce confusion and make governance more accessible for every family.

**Problem Statement:** Build a system that estimates how long a public service should take and alerts citizens when there is unusual delay or repeated unnecessary visits.

**Objectives:**

- Improve clarity of public service processes
- Reduce unnecessary visits and dependency on middlemen
- Make service information easier to understand
- Build citizen confidence in transparent systems

**Scope of Innovation:** Participants may build service trackers, step-by-step guides, document checkers, queue tools, local language assistants, status dashboards, help kiosks, or low-resource workflow models.

**Expected Impact:** Citizens can access services with better clarity, fewer delays, and greater confidence in official processes.

**Challenge Tags:** Public Services • Citizen Access • Transparency • Service Delivery

---

## TMIC-GOV-006

### One-Stop Local Service Navigator

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Citizens often struggle with unclear procedures, missing documents, long queues, repeated visits, and dependency on informal help while accessing public services. A transparent and simple service experience can reduce confusion and make governance more accessible for every family.

**Problem Statement:** Build a local governance navigation tool that helps citizens find where to go, whom to contact, what documents to carry, and how to apply for public services.

**Objectives:**

- Improve clarity of public service processes
- Reduce unnecessary visits and dependency on middlemen
- Make service information easier to understand
- Build citizen confidence in transparent systems

**Scope of Innovation:** Participants may build service trackers, step-by-step guides, document checkers, queue tools, local language assistants, status dashboards, help kiosks, or low-resource workflow models.

**Expected Impact:** Citizens can access services with better clarity, fewer delays, and greater confidence in official processes.

**Challenge Tags:** Public Services • Citizen Access • Transparency • Service Delivery

---

## TMIC-GOV-007

### Public Office Feedback System

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Citizens often struggle with unclear procedures, missing documents, long queues, repeated visits, and dependency on informal help while accessing public services. A transparent and simple service experience can reduce confusion and make governance more accessible for every family.

**Problem Statement:** Build a privacy-safe feedback tool that allows citizens to rate public services based on waiting time, staff behaviour, clarity of process, accessibility, and service completion.

**Objectives:**

- Improve clarity of public service processes
- Reduce unnecessary visits and dependency on middlemen
- Make service information easier to understand
- Build citizen confidence in transparent systems

**Scope of Innovation:** Participants may build service trackers, step-by-step guides, document checkers, queue tools, local language assistants, status dashboards, help kiosks, or low-resource workflow models.

**Expected Impact:** Citizens can access services with better clarity, fewer delays, and greater confidence in official processes.

**Challenge Tags:** Public Services • Citizen Access • Transparency • Service Delivery

---

## TMIC-GOV-008

# Local Language Governance Assistant

Theme: Governance, Transparency & Anti-Corruption

Category: Classes 8-12

**Background:** Citizens often struggle with unclear procedures, missing documents, long queues, repeated visits, and dependency on informal help while accessing public services. A transparent and simple service experience can reduce confusion and make governance more accessible for every family.

**Problem Statement:** Build a multilingual assistant that explains government schemes, forms, procedures, helplines, and service steps in simple local language for students, parents, and citizens.

**Objectives:**

- Improve clarity of public service processes
- Reduce unnecessary visits and dependency on middlemen
- Make service information easier to understand
- Build citizen confidence in transparent systems

**Scope of Innovation:** Participants may build service trackers, step-by-step guides, document checkers, queue tools, local language assistants, status dashboards, help kiosks, or low-resource workflow models.

**Expected Impact:** Citizens can access services with better clarity, fewer delays, and greater confidence in official processes.

**Challenge Tags:** Public Services • Citizen Access • Transparency • Service Delivery

---

## TMIC-GOV-009

### Citizen Rights Help Tool

Theme: Governance, Transparency & Anti-Corruption

Category: Classes 8-12

**Background:** Citizens often struggle with unclear procedures, missing documents, long queues, repeated visits, and dependency on informal help while accessing public services. A transparent and simple service experience can reduce confusion and make governance more accessible for every family.

**Problem Statement:** Build a student-friendly tool that explains basic citizen rights related to public services, documents, complaints, grievance redressal, and fair treatment.

**Objectives:**

- Improve clarity of public service processes
- Reduce unnecessary visits and dependency on middlemen
- Make service information easier to understand
- Build citizen confidence in transparent systems

**Scope of Innovation:** Participants may build service trackers, step-by-step guides, document checkers, queue tools, local language assistants, status dashboards, help kiosks, or low-resource workflow models.

**Expected Impact:** Citizens can access services with better clarity, fewer delays, and greater confidence in official processes.

**Challenge Tags:** Public Services • Citizen Access • Transparency • Service Delivery

---

## TMIC-GOV-010

### Middleman-Free Service Access Model

Theme: Governance, Transparency & Anti-Corruption

Category: Classes 8-12

**Background:** Citizens often struggle with unclear procedures, missing documents, long queues, repeated visits, and dependency on informal help while accessing public services. A transparent and simple service experience can reduce confusion and make governance more accessible for every family.

**Problem Statement:** Build a solution that helps citizens complete common government services without relying on unauthorized middlemen by providing verified steps, fees, timelines, and support points.

**Objectives:**

- Improve clarity of public service processes
- Reduce unnecessary visits and dependency on middlemen
- Make service information easier to understand
- Build citizen confidence in transparent systems

**Scope of Innovation:** Participants may build service trackers, step-by-step guides, document checkers, queue tools, local language assistants, status dashboards, help kiosks, or low-resource workflow models.

**Expected Impact:** Citizens can access services with better clarity, fewer delays, and greater confidence in official processes.

**Challenge Tags:** Public Services • Citizen Access • Transparency • Service Delivery

## B. Grievance, Complaint & Accountability Systems

### TMIC-GOV-011

#### Smart Grievance Filing System

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Many civic issues remain unresolved because complaints are unclear, poorly routed, not tracked, or closed without real action. Citizens need systems that make grievance filing, follow-up, verification, and escalation easier and more accountable.

**Problem Statement:** Build a solution that helps citizens file complaints clearly with category, location, evidence, department selection, and expected resolution timeline.

**Objectives:**

- Simplify complaint filing and tracking
- Improve evidence-based reporting
- Support escalation of unresolved issues
- Create accountability around public problem solving

**Scope of Innovation:** Participants may create grievance apps, complaint templates, evidence tools, escalation workflows, public issue maps, verification networks, dashboards, or offline complaint support systems.

**Expected Impact:** Local problems become easier to report, monitor, verify, and resolve through accountable grievance systems.

**Challenge Tags:** Grievance • Accountability • Civic Issues • Public Dashboard

### TMIC-GOV-012

#### Complaint Escalation Tracker

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Many civic issues remain unresolved because complaints are unclear, poorly routed, not tracked, or closed without real action. Citizens need systems that make grievance filing, follow-up, verification, and escalation easier and more accountable.

**Problem Statement:** Build a tracker that automatically escalates unresolved complaints to higher authorities after a defined time and shows citizens the current accountability level.

**Objectives:**

- Simplify complaint filing and tracking
- Improve evidence-based reporting
- Support escalation of unresolved issues
- Create accountability around public problem solving

**Scope of Innovation:** Participants may create grievance apps, complaint templates, evidence tools, escalation workflows, public issue maps, verification networks, dashboards, or offline complaint support systems.

**Expected Impact:** Local problems become easier to report, monitor, verify, and resolve through accountable grievance systems.

**Challenge Tags:** Grievance • Accountability • Civic Issues • Public Dashboard

---

### TMIC-GOV-013

## Public Problem Heatmap

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Many civic issues remain unresolved because complaints are unclear, poorly routed, not tracked, or closed without real action. Citizens need systems that make grievance filing, follow-up, verification, and escalation easier and more accountable.

**Problem Statement:** Build a map that shows common local problems such as broken roads, drainage issues, garbage piles, streetlight failure, unsafe areas, or water supply complaints.

**Objectives:**

- Simplify complaint filing and tracking
- Improve evidence-based reporting
- Support escalation of unresolved issues
- Create accountability around public problem solving

**Scope of Innovation:** Participants may create grievance apps, complaint templates, evidence tools, escalation workflows, public issue maps, verification networks, dashboards, or offline complaint support systems.

**Expected Impact:** Local problems become easier to report, monitor, verify, and resolve through accountable grievance systems.

**Challenge Tags:** Grievance • Accountability • Civic Issues • Public Dashboard

---

### TMIC-GOV-014

## Evidence-Based Complaint Builder

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Many civic issues remain unresolved because complaints are unclear, poorly routed, not tracked, or closed without real action. Citizens need systems that make grievance filing, follow-up, verification, and escalation easier and more accountable.

**Problem Statement:** Build a tool that helps citizens attach photos, videos, location, date, previous complaint numbers, and descriptions properly while filing civic complaints.

**Objectives:**

- Simplify complaint filing and tracking
- Improve evidence-based reporting
- Support escalation of unresolved issues
- Create accountability around public problem solving

**Scope of Innovation:** Participants may create grievance apps, complaint templates, evidence tools, escalation workflows, public issue maps, verification networks, dashboards, or offline complaint support systems.

**Expected Impact:** Local problems become easier to report, monitor, verify, and resolve through accountable grievance systems.

**Challenge Tags:** Grievance • Accountability • Civic Issues • Public Dashboard

---

### TMIC-GOV-015

## Anonymous Corruption Reporting Support

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Many civic issues remain unresolved because complaints are unclear, poorly routed, not tracked, or closed without real action. Citizens need systems that make grievance filing, follow-up, verification, and escalation easier and more accountable.

**Problem Statement:** Build a privacy-safe reporting model that helps citizens report bribery demands, unfair treatment, or misuse of public service processes without exposing their identity publicly.

**Objectives:**

- Simplify complaint filing and tracking
- Improve evidence-based reporting
- Support escalation of unresolved issues
- Create accountability around public problem solving

**Scope of Innovation:** Participants may create grievance apps, complaint templates, evidence tools, escalation workflows, public issue maps, verification networks, dashboards, or offline complaint support systems.

**Expected Impact:** Local problems become easier to report, monitor, verify, and resolve through accountable grievance systems.

**Challenge Tags:** Grievance • Accountability • Civic Issues • Public Dashboard

---

## TMIC-GOV-016

### Repeated Complaint Pattern Detector

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Many civic issues remain unresolved because complaints are unclear, poorly routed, not tracked, or closed without real action. Citizens need systems that make grievance filing, follow-up, verification, and escalation easier and more accountable.

**Problem Statement:** Build a system that detects repeated complaints from the same area, department, officer desk, road, school, health centre, or public facility to identify unresolved governance gaps.

**Objectives:**

- Simplify complaint filing and tracking
- Improve evidence-based reporting
- Support escalation of unresolved issues
- Create accountability around public problem solving

**Scope of Innovation:** Participants may create grievance apps, complaint templates, evidence tools, escalation workflows, public issue maps, verification networks, dashboards, or offline complaint support systems.

**Expected Impact:** Local problems become easier to report, monitor, verify, and resolve through accountable grievance systems.

**Challenge Tags:** Grievance • Accountability • Civic Issues • Public Dashboard

---

## TMIC-GOV-017

### Grievance Response Quality Checker

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Many civic issues remain unresolved because complaints are unclear, poorly routed, not tracked, or closed without real action. Citizens need systems that make grievance filing, follow-up, verification, and escalation easier and more accountable.

**Problem Statement:** Build a solution that checks whether a complaint was actually solved or only marked as closed without real action.

**Objectives:**

- Simplify complaint filing and tracking
- Improve evidence-based reporting

- Support escalation of unresolved issues
- Create accountability around public problem solving

**Scope of Innovation:** Participants may create grievance apps, complaint templates, evidence tools, escalation workflows, public issue maps, verification networks, dashboards, or offline complaint support systems.

**Expected Impact:** Local problems become easier to report, monitor, verify, and resolve through accountable grievance systems.

**Challenge Tags:** Grievance • Accountability • Civic Issues • Public Dashboard

## TMIC-GOV-018

### Citizen Follow-Up Reminder System

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Many civic issues remain unresolved because complaints are unclear, poorly routed, not tracked, or closed without real action. Citizens need systems that make grievance filing, follow-up, verification, and escalation easier and more accountable.

**Problem Statement:** Build a system that reminds citizens about follow-up dates, required visits, pending documents, complaint deadlines, and escalation options.

#### Objectives:

- Simplify complaint filing and tracking
- Improve evidence-based reporting
- Support escalation of unresolved issues
- Create accountability around public problem solving

**Scope of Innovation:** Participants may create grievance apps, complaint templates, evidence tools, escalation workflows, public issue maps, verification networks, dashboards, or offline complaint support systems.

**Expected Impact:** Local problems become easier to report, monitor, verify, and resolve through accountable grievance systems.

**Challenge Tags:** Grievance • Accountability • Civic Issues • Public Dashboard

## TMIC-GOV-019

### Public Issue Verification Network

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Many civic issues remain unresolved because complaints are unclear, poorly routed, not tracked, or closed without real action. Citizens need systems that make grievance filing, follow-up, verification, and escalation easier and more accountable.

**Problem Statement:** Build a community verification system where multiple citizens can confirm whether a reported local issue is genuine, urgent, solved, or still pending.

#### Objectives:

- Simplify complaint filing and tracking
- Improve evidence-based reporting
- Support escalation of unresolved issues
- Create accountability around public problem solving

**Scope of Innovation:** Participants may create grievance apps, complaint templates, evidence tools, escalation workflows, public issue maps, verification networks, dashboards, or offline complaint support systems.

**Expected Impact:** Local problems become easier to report, monitor, verify, and resolve through accountable grievance systems.

**Challenge Tags:** Grievance • Accountability • Civic Issues • Public Dashboard

## TMIC-GOV-020

# Governance Transparency Dashboard

Theme: Governance, Transparency & Anti-Corruption

Category: Classes 8-12

**Background:** Many civic issues remain unresolved because complaints are unclear, poorly routed, not tracked, or closed without real action. Citizens need systems that make grievance filing, follow-up, verification, and escalation easier and more accountable.

**Problem Statement:** Build a dashboard that displays department-wise complaints, average response time, solved cases, pending cases, repeated issues, and public satisfaction in a simple format.

### Objectives:

- Simplify complaint filing and tracking
- Improve evidence-based reporting
- Support escalation of unresolved issues
- Create accountability around public problem solving

**Scope of Innovation:** Participants may create grievance apps, complaint templates, evidence tools, escalation workflows, public issue maps, verification networks, dashboards, or offline complaint support systems.

**Expected Impact:** Local problems become easier to report, monitor, verify, and resolve through accountable grievance systems.

**Challenge Tags:** Grievance • Accountability • Civic Issues • Public Dashboard

## C. Anti-Corruption, Fair Process & Public Trust

## TMIC-GOV-021

# Bribe Risk Awareness System

Theme: Governance, Transparency & Anti-Corruption

Category: Classes 8-12

**Background:** Lack of information about official fees, timelines, selection criteria, procurement, and public works can create space for unfair practices and mistrust. Transparent tools can help citizens verify information and reduce opportunities for misuse.

**Problem Statement:** Build a tool that helps citizens understand official fees, required steps, legal timelines, and warning signs of possible bribery or unfair demand.

### Objectives:

- Make official fees, timelines, and criteria visible
- Reduce risk of unfair demands or misuse
- Improve trust through verifiable records
- Support transparent public decisions and spending

**Scope of Innovation:** Teams may develop fee checkers, receipt verification tools, public work trackers, budget visualizers, scoring models, asset verification systems, procurement records, or trust dashboards.

**Expected Impact:** Citizens gain stronger visibility into public processes, reducing confusion and improving public trust.

**Challenge Tags:** Anti-Corruption • Public Trust • Verification • Fair Process

## TMIC-GOV-022

# Official Fee Verification Tool

Theme: Governance, Transparency & Anti-Corruption

Category: Classes 8-12

**Background:** Lack of information about official fees, timelines, selection criteria, procurement, and public works can create space for unfair practices and mistrust. Transparent tools can help citizens verify information and reduce

opportunities for misuse.

**Problem Statement:** Build a solution that lets citizens verify the official fee for public services and compare it with any amount demanded during the process.

**Objectives:**

- Make official fees, timelines, and criteria visible
- Reduce risk of unfair demands or misuse
- Improve trust through verifiable records
- Support transparent public decisions and spending

**Scope of Innovation:** Teams may develop fee checkers, receipt verification tools, public work trackers, budget visualizers, scoring models, asset verification systems, procurement records, or trust dashboards.

**Expected Impact:** Citizens gain stronger visibility into public processes, reducing confusion and improving public trust.

**Challenge Tags:** Anti-Corruption • Public Trust • Verification • Fair Process

---

## TMIC-GOV-023

### Receipt and Payment Transparency System

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Lack of information about official fees, timelines, selection criteria, procurement, and public works can create space for unfair practices and mistrust. Transparent tools can help citizens verify information and reduce opportunities for misuse.

**Problem Statement:** Build a model that ensures citizens receive proper receipts for public payments and can verify whether payments are official, recorded, and traceable.

**Objectives:**

- Make official fees, timelines, and criteria visible
- Reduce risk of unfair demands or misuse
- Improve trust through verifiable records
- Support transparent public decisions and spending

**Scope of Innovation:** Teams may develop fee checkers, receipt verification tools, public work trackers, budget visualizers, scoring models, asset verification systems, procurement records, or trust dashboards.

**Expected Impact:** Citizens gain stronger visibility into public processes, reducing confusion and improving public trust.

**Challenge Tags:** Anti-Corruption • Public Trust • Verification • Fair Process

---

## TMIC-GOV-024

### Fair Selection Transparency Tool

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Lack of information about official fees, timelines, selection criteria, procurement, and public works can create space for unfair practices and mistrust. Transparent tools can help citizens verify information and reduce opportunities for misuse.

**Problem Statement:** Build a system that improves transparency in selections for scholarships, competitions, benefits, admissions, internships, or local opportunities by showing criteria, status, and result explanation.

**Objectives:**

- Make official fees, timelines, and criteria visible
- Reduce risk of unfair demands or misuse
- Improve trust through verifiable records
- Support transparent public decisions and spending

**Scope of Innovation:** Teams may develop fee checkers, receipt verification tools, public work trackers, budget visualizers, scoring models, asset verification systems, procurement records, or trust dashboards.

**Expected Impact:** Citizens gain stronger visibility into public processes, reducing confusion and improving public trust.

**Challenge Tags:** Anti-Corruption • Public Trust • Verification • Fair Process

---

## TMIC-GOV-025

### Public Work Progress Tracker

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Lack of information about official fees, timelines, selection criteria, procurement, and public works can create space for unfair practices and mistrust. Transparent tools can help citizens verify information and reduce opportunities for misuse.

**Problem Statement:** Build a solution that tracks local public works such as roads, drains, school repairs, streetlights, or water projects with progress photos, deadlines, budget visibility, and citizen feedback.

**Objectives:**

- Make official fees, timelines, and criteria visible
- Reduce risk of unfair demands or misuse
- Improve trust through verifiable records
- Support transparent public decisions and spending

**Scope of Innovation:** Teams may develop fee checkers, receipt verification tools, public work trackers, budget visualizers, scoring models, asset verification systems, procurement records, or trust dashboards.

**Expected Impact:** Citizens gain stronger visibility into public processes, reducing confusion and improving public trust.

**Challenge Tags:** Anti-Corruption • Public Trust • Verification • Fair Process

---

## TMIC-GOV-026

### Local Budget Visibility Tool

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Lack of information about official fees, timelines, selection criteria, procurement, and public works can create space for unfair practices and mistrust. Transparent tools can help citizens verify information and reduce opportunities for misuse.

**Problem Statement:** Build a student-friendly tool that explains how local funds are allocated and spent on schools, roads, sanitation, water, parks, or public facilities.

**Objectives:**

- Make official fees, timelines, and criteria visible
- Reduce risk of unfair demands or misuse
- Improve trust through verifiable records
- Support transparent public decisions and spending

**Scope of Innovation:** Teams may develop fee checkers, receipt verification tools, public work trackers, budget visualizers, scoring models, asset verification systems, procurement records, or trust dashboards.

**Expected Impact:** Citizens gain stronger visibility into public processes, reducing confusion and improving public trust.

**Challenge Tags:** Anti-Corruption • Public Trust • Verification • Fair Process

---

## TMIC-GOV-027

### Procurement Transparency Model

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Lack of information about official fees, timelines, selection criteria, procurement, and public works can create space for unfair practices and mistrust. Transparent tools can help citizens verify information and reduce opportunities for misuse.

**Problem Statement:** Build a simplified transparency system that helps schools or local bodies compare vendor rates, quality, delivery status, and purchase records to reduce misuse.

**Objectives:**

- Make official fees, timelines, and criteria visible
- Reduce risk of unfair demands or misuse
- Improve trust through verifiable records
- Support transparent public decisions and spending

**Scope of Innovation:** Teams may develop fee checkers, receipt verification tools, public work trackers, budget visualizers, scoring models, asset verification systems, procurement records, or trust dashboards.

**Expected Impact:** Citizens gain stronger visibility into public processes, reducing confusion and improving public trust.

**Challenge Tags:** Anti-Corruption • Public Trust • Verification • Fair Process

---

## TMIC-GOV-028

### Conflict of Interest Detector

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Lack of information about official fees, timelines, selection criteria, procurement, and public works can create space for unfair practices and mistrust. Transparent tools can help citizens verify information and reduce opportunities for misuse.

**Problem Statement:** Build a model that helps identify possible conflict of interest in school committees, local purchases, event contracts, or selection processes using disclosed relationships and decision roles.

**Objectives:**

- Make official fees, timelines, and criteria visible
- Reduce risk of unfair demands or misuse
- Improve trust through verifiable records
- Support transparent public decisions and spending

**Scope of Innovation:** Teams may develop fee checkers, receipt verification tools, public work trackers, budget visualizers, scoring models, asset verification systems, procurement records, or trust dashboards.

**Expected Impact:** Citizens gain stronger visibility into public processes, reducing confusion and improving public trust.

**Challenge Tags:** Anti-Corruption • Public Trust • Verification • Fair Process

---

## TMIC-GOV-029

### Public Asset Verification System

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Lack of information about official fees, timelines, selection criteria, procurement, and public works can create space for unfair practices and mistrust. Transparent tools can help citizens verify information and reduce opportunities for misuse.

**Problem Statement:** Build a system that helps citizens verify whether public assets like benches, streetlights, toilets, dustbins, computers, projectors, or school equipment actually exist and are usable.

**Objectives:**

- Make official fees, timelines, and criteria visible
- Reduce risk of unfair demands or misuse
- Improve trust through verifiable records
- Support transparent public decisions and spending

**Scope of Innovation:** Teams may develop fee checkers, receipt verification tools, public work trackers, budget visualizers, scoring models, asset verification systems, procurement records, or trust dashboards.

**Expected Impact:** Citizens gain stronger visibility into public processes, reducing confusion and improving public trust.

**Challenge Tags:** Anti-Corruption • Public Trust • Verification • Fair Process

---

## TMIC-GOV-030

### Trust Score for Public Service Centres

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Lack of information about official fees, timelines, selection criteria, procurement, and public works can create space for unfair practices and mistrust. Transparent tools can help citizens verify information and reduce opportunities for misuse.

**Problem Statement:** Build a scoring model that evaluates public service centres based on transparency, official fee display, waiting time, complaint resolution, accessibility, and citizen experience.

**Objectives:**

- Make official fees, timelines, and criteria visible
- Reduce risk of unfair demands or misuse
- Improve trust through verifiable records
- Support transparent public decisions and spending

**Scope of Innovation:** Teams may develop fee checkers, receipt verification tools, public work trackers, budget visualizers, scoring models, asset verification systems, procurement records, or trust dashboards.

**Expected Impact:** Citizens gain stronger visibility into public processes, reducing confusion and improving public trust.

**Challenge Tags:** Anti-Corruption • Public Trust • Verification • Fair Process

## D. School Governance, Student Voice & Institutional Transparency

## TMIC-GOV-031

### Student Suggestion to Action Tracker

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Schools also need transparent systems for suggestions, complaints, resources, events, maintenance, selection, communication, and scholarships. Student-friendly governance tools can help learners understand accountability in their own campus.

**Problem Statement:** Build a system where students can submit school improvement ideas and track whether they were reviewed, accepted, rejected, or implemented.

**Objectives:**

- Improve transparency inside schools
- Give students and parents clearer information
- Track actions, resources, and complaints
- Promote fair participation and responsible governance

**Scope of Innovation:** Participants may build school dashboards, suggestion trackers, complaint systems, resource logs, selection tools, fee clarity models, maintenance trackers, or student council transparency platforms.

**Expected Impact:** Schools become more accountable, participative, and efficient, while students learn governance through real campus systems.

**Challenge Tags:** School Governance • Student Voice • Transparency • Accountability

---

## TMIC-GOV-032

## Transparent School Resource Usage

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Schools also need transparent systems for suggestions, complaints, resources, events, maintenance, selection, communication, and scholarships. Student-friendly governance tools can help learners understand accountability in their own campus.

**Problem Statement:** Build a solution that helps schools track and display how shared resources such as labs, projectors, sports equipment, books, and classrooms are used and maintained.

**Objectives:**

- Improve transparency inside schools
- Give students and parents clearer information
- Track actions, resources, and complaints
- Promote fair participation and responsible governance

**Scope of Innovation:** Participants may build school dashboards, suggestion trackers, complaint systems, resource logs, selection tools, fee clarity models, maintenance trackers, or student council transparency platforms.

**Expected Impact:** Schools become more accountable, participative, and efficient, while students learn governance through real campus systems.

**Challenge Tags:** School Governance • Student Voice • Transparency • Accountability

---

### TMIC-GOV-033

## School Complaint Redressal System

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Schools also need transparent systems for suggestions, complaints, resources, events, maintenance, selection, communication, and scholarships. Student-friendly governance tools can help learners understand accountability in their own campus.

**Problem Statement:** Build a student-friendly complaint system for issues related to facilities, safety, bullying, transport, cleanliness, teaching support, or administration with clear escalation and closure tracking.

**Objectives:**

- Improve transparency inside schools
- Give students and parents clearer information
- Track actions, resources, and complaints
- Promote fair participation and responsible governance

**Scope of Innovation:** Participants may build school dashboards, suggestion trackers, complaint systems, resource logs, selection tools, fee clarity models, maintenance trackers, or student council transparency platforms.

**Expected Impact:** Schools become more accountable, participative, and efficient, while students learn governance through real campus systems.

**Challenge Tags:** School Governance • Student Voice • Transparency • Accountability

---

### TMIC-GOV-034

## Fair House and Club Selection System

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Schools also need transparent systems for suggestions, complaints, resources, events, maintenance, selection, communication, and scholarships. Student-friendly governance tools can help learners understand accountability in their own campus.

**Problem Statement:** Build a transparent system that makes selection for school clubs, houses, councils, sports teams, and leadership roles fair, criteria-based, and trackable.

**Objectives:**

- Improve transparency inside schools
- Give students and parents clearer information
- Track actions, resources, and complaints
- Promote fair participation and responsible governance

**Scope of Innovation:** Participants may build school dashboards, suggestion trackers, complaint systems, resource logs, selection tools, fee clarity models, maintenance trackers, or student council transparency platforms.

**Expected Impact:** Schools become more accountable, participative, and efficient, while students learn governance through real campus systems.

**Challenge Tags:** School Governance • Student Voice • Transparency • Accountability

---

## TMIC-GOV-035

### School Fee Transparency Tool

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Schools also need transparent systems for suggestions, complaints, resources, events, maintenance, selection, communication, and scholarships. Student-friendly governance tools can help learners understand accountability in their own campus.

**Problem Statement:** Build a solution that helps parents understand fee components, due dates, optional charges, receipts, concessions, and payment status clearly.

**Objectives:**

- Improve transparency inside schools
- Give students and parents clearer information
- Track actions, resources, and complaints
- Promote fair participation and responsible governance

**Scope of Innovation:** Participants may build school dashboards, suggestion trackers, complaint systems, resource logs, selection tools, fee clarity models, maintenance trackers, or student council transparency platforms.

**Expected Impact:** Schools become more accountable, participative, and efficient, while students learn governance through real campus systems.

**Challenge Tags:** School Governance • Student Voice • Transparency • Accountability

---

## TMIC-GOV-036

### Parent-School Communication Accountability

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Schools also need transparent systems for suggestions, complaints, resources, events, maintenance, selection, communication, and scholarships. Student-friendly governance tools can help learners understand accountability in their own campus.

**Problem Statement:** Build a system that tracks whether important school notices, complaints, requests, and parent queries were delivered, read, responded to, and resolved.

**Objectives:**

- Improve transparency inside schools
- Give students and parents clearer information
- Track actions, resources, and complaints
- Promote fair participation and responsible governance

**Scope of Innovation:** Participants may build school dashboards, suggestion trackers, complaint systems, resource logs, selection tools, fee clarity models, maintenance trackers, or student council transparency platforms.

**Expected Impact:** Schools become more accountable, participative, and efficient, while students learn governance through real campus systems.

### TMIC-GOV-037

## Transparent Event Budget Planner

Theme: Governance, Transparency & Anti-Corruption

Category: Classes 8-12

**Background:** Schools also need transparent systems for suggestions, complaints, resources, events, maintenance, selection, communication, and scholarships. Student-friendly governance tools can help learners understand accountability in their own campus.

**Problem Statement:** Build a tool that helps schools plan events transparently by tracking budget, vendors, materials, student contributions, sponsorship, and expense records.

**Objectives:**

- Improve transparency inside schools
- Give students and parents clearer information
- Track actions, resources, and complaints
- Promote fair participation and responsible governance

**Scope of Innovation:** Participants may build school dashboards, suggestion trackers, complaint systems, resource logs, selection tools, fee clarity models, maintenance trackers, or student council transparency platforms.

**Expected Impact:** Schools become more accountable, participative, and efficient, while students learn governance through real campus systems.

Challenge Tags: School Governance • Student Voice • Transparency • Accountability

---

### TMIC-GOV-038

## Student Council Governance Dashboard

Theme: Governance, Transparency & Anti-Corruption

Category: Classes 8-12

**Background:** Schools also need transparent systems for suggestions, complaints, resources, events, maintenance, selection, communication, and scholarships. Student-friendly governance tools can help learners understand accountability in their own campus.

**Problem Statement:** Build a dashboard where student council promises, activities, responsibilities, meeting notes, and progress updates are visible to all students.

**Objectives:**

- Improve transparency inside schools
- Give students and parents clearer information
- Track actions, resources, and complaints
- Promote fair participation and responsible governance

**Scope of Innovation:** Participants may build school dashboards, suggestion trackers, complaint systems, resource logs, selection tools, fee clarity models, maintenance trackers, or student council transparency platforms.

**Expected Impact:** Schools become more accountable, participative, and efficient, while students learn governance through real campus systems.

Challenge Tags: School Governance • Student Voice • Transparency • Accountability

### TMIC-GOV-039

## School Maintenance Request System

Theme: Governance, Transparency & Anti-Corruption

Category: Classes 8-12

**Background:** Schools also need transparent systems for suggestions, complaints, resources, events, maintenance, selection, communication, and scholarships. Student-friendly governance tools can help learners understand

accountability in their own campus.

**Problem Statement:** Build a solution that allows students and staff to report broken furniture, lights, fans, washroom issues, unsafe areas, or classroom damage and track repair status.

**Objectives:**

- Improve transparency inside schools
- Give students and parents clearer information
- Track actions, resources, and complaints
- Promote fair participation and responsible governance

**Scope of Innovation:** Participants may build school dashboards, suggestion trackers, complaint systems, resource logs, selection tools, fee clarity models, maintenance trackers, or student council transparency platforms.

**Expected Impact:** Schools become more accountable, participative, and efficient, while students learn governance through real campus systems.

**Challenge Tags:** School Governance • Student Voice • Transparency • Accountability

---

## TMIC-GOV-040

### Transparent Scholarship Support System

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Schools also need transparent systems for suggestions, complaints, resources, events, maintenance, selection, communication, and scholarships. Student-friendly governance tools can help learners understand accountability in their own campus.

**Problem Statement:** Build a tool that helps students discover scholarships, check eligibility, track application steps, avoid document mistakes, and verify final selection status.

**Objectives:**

- Improve transparency inside schools
- Give students and parents clearer information
- Track actions, resources, and complaints
- Promote fair participation and responsible governance

**Scope of Innovation:** Participants may build school dashboards, suggestion trackers, complaint systems, resource logs, selection tools, fee clarity models, maintenance trackers, or student council transparency platforms.

**Expected Impact:** Schools become more accountable, participative, and efficient, while students learn governance through real campus systems.

**Challenge Tags:** School Governance • Student Voice • Transparency • Accountability

## E. Welfare Delivery, Civic Participation & Community Governance

## TMIC-GOV-041

### Welfare Scheme Eligibility Checker

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Welfare schemes, public facilities, local meetings, and civic participation affect everyday life, but citizens may lack clear information, access, or feedback channels. Civic-tech solutions can help communities participate in local governance more meaningfully.

**Problem Statement:** Build a tool that helps citizens check eligibility for public welfare schemes using simple questions and gives clear next steps without collecting unnecessary personal data.

**Objectives:**

- Improve access to welfare and public services
- Support civic participation and local decision-making

- Make public facilities easier to monitor
- Promote inclusive and transparent community governance

**Scope of Innovation:** Teams may create eligibility checkers, benefit trackers, voting tools, helpline directories, meeting trackers, social audit kits, facility rating systems, or locality-level governance dashboards.

**Expected Impact:** Communities become more informed, participative, and capable of monitoring local governance outcomes.

**Challenge Tags:** Civic Tech • Welfare Delivery • Community Governance • Social Audit

## TMIC-GOV-042

### Benefit Delivery Tracking System

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Welfare schemes, public facilities, local meetings, and civic participation affect everyday life, but citizens may lack clear information, access, or feedback channels. Civic-tech solutions can help communities participate in local governance more meaningfully.

**Problem Statement:** Build a system that helps beneficiaries track whether public benefits such as scholarships, pensions, subsidies, or support payments have been approved, delayed, rejected, or credited.

**Objectives:**

- Improve access to welfare and public services
- Support civic participation and local decision-making
- Make public facilities easier to monitor
- Promote inclusive and transparent community governance

**Scope of Innovation:** Teams may create eligibility checkers, benefit trackers, voting tools, helpline directories, meeting trackers, social audit kits, facility rating systems, or locality-level governance dashboards.

**Expected Impact:** Communities become more informed, participative, and capable of monitoring local governance outcomes.

**Challenge Tags:** Civic Tech • Welfare Delivery • Community Governance • Social Audit

## TMIC-GOV-043

### Local Development Voting Platform

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Welfare schemes, public facilities, local meetings, and civic participation affect everyday life, but citizens may lack clear information, access, or feedback channels. Civic-tech solutions can help communities participate in local governance more meaningfully.

**Problem Statement:** Build a civic participation tool where students or citizens can vote on priority local issues such as drainage, road repair, cleanliness, lighting, parks, libraries, or water supply.

**Objectives:**

- Improve access to welfare and public services
- Support civic participation and local decision-making
- Make public facilities easier to monitor
- Promote inclusive and transparent community governance

**Scope of Innovation:** Teams may create eligibility checkers, benefit trackers, voting tools, helpline directories, meeting trackers, social audit kits, facility rating systems, or locality-level governance dashboards.

**Expected Impact:** Communities become more informed, participative, and capable of monitoring local governance outcomes.

**Challenge Tags:** Civic Tech • Welfare Delivery • Community Governance • Social Audit

## TMIC-GOV-044

### Civic Duty Gamification System

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Welfare schemes, public facilities, local meetings, and civic participation affect everyday life, but citizens may lack clear information, access, or feedback channels. Civic-tech solutions can help communities participate in local governance more meaningfully.

**Problem Statement:** Build a gamified solution that encourages students to participate in civic actions such as reporting civic issues, attending awareness drives, helping elders with forms, or monitoring public cleanliness.

**Objectives:**

- Improve access to welfare and public services
- Support civic participation and local decision-making
- Make public facilities easier to monitor
- Promote inclusive and transparent community governance

**Scope of Innovation:** Teams may create eligibility checkers, benefit trackers, voting tools, helpline directories, meeting trackers, social audit kits, facility rating systems, or locality-level governance dashboards.

**Expected Impact:** Communities become more informed, participative, and capable of monitoring local governance outcomes.

**Challenge Tags:** Civic Tech • Welfare Delivery • Community Governance • Social Audit

---

## TMIC-GOV-045

### Verified Helpline Directory

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Welfare schemes, public facilities, local meetings, and civic participation affect everyday life, but citizens may lack clear information, access, or feedback channels. Civic-tech solutions can help communities participate in local governance more meaningfully.

**Problem Statement:** Build a local helpline directory that verifies and organizes important contacts for police, ambulance, fire, women safety, child protection, municipal services, disaster response, and public offices.

**Objectives:**

- Improve access to welfare and public services
- Support civic participation and local decision-making
- Make public facilities easier to monitor
- Promote inclusive and transparent community governance

**Scope of Innovation:** Teams may create eligibility checkers, benefit trackers, voting tools, helpline directories, meeting trackers, social audit kits, facility rating systems, or locality-level governance dashboards.

**Expected Impact:** Communities become more informed, participative, and capable of monitoring local governance outcomes.

**Challenge Tags:** Civic Tech • Welfare Delivery • Community Governance • Social Audit

---

## TMIC-GOV-046

### Public Meeting Transparency Tool

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Welfare schemes, public facilities, local meetings, and civic participation affect everyday life, but citizens may lack clear information, access, or feedback channels. Civic-tech solutions can help communities participate in local governance more meaningfully.

**Problem Statement:** Build a solution that records and shares key decisions, action items, deadlines, and responsible persons from school, ward, village, or community meetings.

**Objectives:**

- Improve access to welfare and public services
- Support civic participation and local decision-making
- Make public facilities easier to monitor
- Promote inclusive and transparent community governance

**Scope of Innovation:** Teams may create eligibility checkers, benefit trackers, voting tools, helpline directories, meeting trackers, social audit kits, facility rating systems, or locality-level governance dashboards.

**Expected Impact:** Communities become more informed, participative, and capable of monitoring local governance outcomes.

**Challenge Tags:** Civic Tech • Welfare Delivery • Community Governance • Social Audit

---

## TMIC-GOV-047

### Social Audit Toolkit for Students

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Welfare schemes, public facilities, local meetings, and civic participation affect everyday life, but citizens may lack clear information, access, or feedback channels. Civic-tech solutions can help communities participate in local governance more meaningfully.

**Problem Statement:** Build a student-friendly toolkit that helps young people conduct basic social audits of public facilities like schools, toilets, parks, libraries, roads, or health centres.

**Objectives:**

- Improve access to welfare and public services
- Support civic participation and local decision-making
- Make public facilities easier to monitor
- Promote inclusive and transparent community governance

**Scope of Innovation:** Teams may create eligibility checkers, benefit trackers, voting tools, helpline directories, meeting trackers, social audit kits, facility rating systems, or locality-level governance dashboards.

**Expected Impact:** Communities become more informed, participative, and capable of monitoring local governance outcomes.

**Challenge Tags:** Civic Tech • Welfare Delivery • Community Governance • Social Audit

---

## TMIC-GOV-048

### Inclusive Access to Government Services

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Welfare schemes, public facilities, local meetings, and civic participation affect everyday life, but citizens may lack clear information, access, or feedback channels. Civic-tech solutions can help communities participate in local governance more meaningfully.

**Problem Statement:** Build a solution that helps elderly people, differently-abled citizens, low-literacy users, or rural families access government services more easily.

**Objectives:**

- Improve access to welfare and public services
- Support civic participation and local decision-making
- Make public facilities easier to monitor
- Promote inclusive and transparent community governance

**Scope of Innovation:** Teams may create eligibility checkers, benefit trackers, voting tools, helpline directories, meeting trackers, social audit kits, facility rating systems, or locality-level governance dashboards.

**Expected Impact:** Communities become more informed, participative, and capable of monitoring local governance outcomes.

**Challenge Tags:** Civic Tech • Welfare Delivery • Community Governance • Social Audit

---

## TMIC-GOV-049

### Public Facility Rating System

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Welfare schemes, public facilities, local meetings, and civic participation affect everyday life, but citizens may lack clear information, access, or feedback channels. Civic-tech solutions can help communities participate in local governance more meaningfully.

**Problem Statement:** Build a rating and reporting system for public facilities such as toilets, parks, bus stops, schools, hospitals, libraries, and service centres based on cleanliness, accessibility, safety, and usability.

**Objectives:**

- Improve access to welfare and public services
- Support civic participation and local decision-making
- Make public facilities easier to monitor
- Promote inclusive and transparent community governance

**Scope of Innovation:** Teams may create eligibility checkers, benefit trackers, voting tools, helpline directories, meeting trackers, social audit kits, facility rating systems, or locality-level governance dashboards.

**Expected Impact:** Communities become more informed, participative, and capable of monitoring local governance outcomes.

**Challenge Tags:** Civic Tech • Welfare Delivery • Community Governance • Social Audit

---

## TMIC-GOV-050

### Student-Led Transparent Locality Model

**Theme:** Governance, Transparency & Anti-Corruption

**Category:** Classes 8-12

**Background:** Welfare schemes, public facilities, local meetings, and civic participation affect everyday life, but citizens may lack clear information, access, or feedback channels. Civic-tech solutions can help communities participate in local governance more meaningfully.

**Problem Statement:** Build a student-led governance model that improves transparency, complaint tracking, public facility monitoring, civic participation, and community accountability in one locality or village.

**Objectives:**

- Improve access to welfare and public services
- Support civic participation and local decision-making
- Make public facilities easier to monitor
- Promote inclusive and transparent community governance

**Scope of Innovation:** Teams may create eligibility checkers, benefit trackers, voting tools, helpline directories, meeting trackers, social audit kits, facility rating systems, or locality-level governance dashboards.

**Expected Impact:** Communities become more informed, participative, and capable of monitoring local governance outcomes.

**Challenge Tags:** Civic Tech • Welfare Delivery • Community Governance • Social Audit
